YWCA Olympia Supports Olympia Home Fund

YWCA has long advocated for the health and safety of women and girls. Nationally, the YWCA USA network is the largest provider of domestic violence shelters and services in the country, serving over 500,000 women and children annually through safety services.

Because access to safe shelter and housing has historically and continues to be a cornerstone program of YWCAs across the nation, aligned with our national focus of domestic violence, women's economic empowerment, and health and safety, and due to local needs, YWCA Olympia is proud to endorse the Olympia Home Fund.

Locally, serving more than 14,000 community members through programs and basic services, YWCA Olympia is face-to-face with the housing crisis everyday as well as the web of interrelated challenges such as physical and mental health, unemployment, and substance abuse. Housing the most vulnerable populations in our community is directly aligned with the YWCA Olympia's vision of creating a community where all people are valued, live free from oppression and thrive in a just society. We encourage the community to join us in supporting the Home Fund.
